Dear Sir/Madam,

APPLICATION FOR MUNICIPAL SERVICES (WASTEWATER DISPOSAL)

Green Gate Energy (Pty) Ltd has received an Environmental Authorisation for the development of a 230MW Solar PV facility on Portion 1 of Steenbokpan 295 LQ within the Jurisdiction of Lephalale Local Municipality, Limpopo Province. The environmental authorisation (EA) was granted on the 13th of November 2024.

The Water Use License Application is currently in progress with the Department of Water and Sanitation. One of the key requirements for the approval of the Water Use Licence is that the Wastewater Disposal methods of the project be known. The project is expected to generate approximately 1000m³ of sewage water annually. As such, Green Gate Energy is hereby applying for disposal of sewage waste at the Lephalale Local Municipality WWTW.

Information regarding the following would be greatly appreciated:

1. Approval Letter confirming that the Municipality can accommodated the project wastewater
2. Is the wastewater treatment works licensed (please provide proof of the licence)?

Please do not hesitate to contact me should you need any further information and/or details.

Regards

Lehlohonolo Godfrey Mothobi: (Director)

Green Gate Energy (Pty) Limited
